## Investment objective

The Fund's investment objective is to seek long-term growth of capital.

The Fund invests primarily in companies both in developed markets - excluding the United States ("international value portfolio") - and in emerging markets ("emerging markets portfolio"). The Investment Adviser allocates substantially all of the Fund's assets between the international value portfolio and the emerging markets portfolio using a proprietary asset allocation model.

## Fund features

- The international value portfolio uses bottom-up stock selection based on fundamental research, focusing on mid to large cap value stocks in developed international markets.
- The emerging markets portfolio uses an actively managed tracking-error oriented quantitative strategy, combining bottom-up and top-down factors in security selection.

The performance data quoted herein represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost, and current performance may be lower than the performance quoted. For performance data current to the most recent month end, please call 1.866.947.7000.

Returns greater than one year are annualized. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid. Investment performance reflects contractual fee waivers. In the absence of such fee waivers, total return would be reduced. Investor Class shares charge up to a 0.25% annual shareholder service fee.

**Market commentary**

Developed equity markets appreciated in the third quarter following signs of continuing global growth, albeit less synchronized than in 2017 as the US has outpaced other developed markets. Emerging markets equities, on the other hand, posted negative returns during the quarter as country-specific challenges and continuing trade tensions weighed on performance. The top performing markets in our investable universe included Thailand, Qatar, Poland, Switzerland, and Taiwan. The worst performing markets included Turkey, Greece, China, South Africa, and Egypt. The best performing sectors in the MSCI ACWI ex US Index ("Index") were health care, energy, and telecommunication services. The worst performing sectors were real estate, consumer discretionary, and information technology.

The Causeway International Opportunities Fund ("Fund") underperformed the Index during the quarter, due primarily to stock selection. Fund holdings in the banks, food beverage & tobacco, capital goods, telecommunication services, and utilities industry groups detracted from relative performance. Holdings in the pharmaceuticals & biotechnology, automobiles & components, transportation, consumer services, and software & services industry groups offset some of the underperformance. The largest detractor was electronic components manufacturer, Yageo Corp. (Taiwan). Additional notable detractors included online services company, Tencent Holdings Ltd. (China), British American Tobacco plc (United Kingdom), banking & financial services company, Barclays Plc (United Kingdom), and banking & financial services company, UniCredit S.p.A. (Italy). The top contributor to return was pharmaceutical & consumer healthcare products producer, Novartis AG (Switzerland). Other notable contributors included pharmaceutical company, AstraZeneca Plc (United Kingdom), rail operator, Canadian Pacific Railway (Canada), automobile manufacturer, Volkswagen AG (Germany), and paints & coatings producer, Akzo Nobel NV (Netherlands).

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. Diversification does not protect against market loss. There is no guarantee that securities mentioned will remain in or out of the Fund.

The market commentary expresses the portfolio managers' views as of the date of this report and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Any securities identified and described do not represent all of the securities purchased, sold, or recommended for the Fund. The reader should not assume that an investment in any securities identified was or will be profitable.

The MSCI All Country World Index ex-US (Gross) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. It is not possible to invest directly in an index.
