**Market commentary**

Developed equity markets appreciated in the third quarter following signs of continuing global growth, albeit less synchronized than in 2017 as the US has outpaced other developed markets. The top performing markets in our investable universe included Switzerland, Sweden, Norway, Israel, and Japan. The worst performing markets included China, Ireland, Belgium, Italy, and Spain. The best performing sectors in the MSCI EAFE Index ("Index") were health care, telecommunication services, and energy. The worst performing sectors were real estate, utilities, and consumer discretionary. Every major currency except the Canadian dollar and Swiss franc depreciated versus the US dollar during the period, thus diminishing overall returns on overseas assets for US dollar-based investors.

The Causeway International Value Fund ("Fund") modestly underperformed the Index during the quarter, due primarily to country allocation (a byproduct of our bottom-up stock selection process). Fund holdings in the banks, food beverage & tobacco, capital goods, utilities, and insurance industry groups detracted from relative performance. Holdings in the telecommunication services, pharmaceuticals & biotechnology, transportation, and automobiles & components industry groups, as well as an underweight position in the semiconductors & semi equipment industry group, offset some of the relative underperformance. The largest detractor was banking & financial services company, UniCredit S.p.A. (Italy). Additional notable detractors included banking & financial services company, Barclays Plc (United Kingdom), utilities provider, SSE Plc (United Kingdom), British American Tobacco plc (United Kingdom), and diversified chemicals manufacturer, BASF SE (Germany). The top contributor to return was wireless communications operator, SK Telecom Co., Ltd. (South Korea). Other notable contributors included mobile telecommunications operator, China Mobile Ltd. (China), pharmaceutical & consumer healthcare products producer, Novartis AG (Switzerland), pharmaceutical company, AstraZeneca Plc (United Kingdom), and rail operator, Canadian Pacific Railway (Canada).

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. Diversification does not protect against market loss. There is no guarantee that securities mentioned will remain in or out of the Fund.

The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to [global.morningstar.com/managerdisclosures/](http://global.morningstar.com/managerdisclosures/).

The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause Analyst expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.
